Abstract

This document provides guidance on evaluating how well websites conform to the Web Content Accessibility Guidelines (WCAG) 2.0. It describes a procedure to evaluate websites and includes considerations to guide evaluators and to promote good practice. It does not provide instructions for evaluating web content feature by feature, which is addressed by WCAG 2.0 success criteria. This document is one of a series of informative W3C/WAI resources about Evaluating Websites for Accessibility that complement the WCAG 2.0 Documents. It does not define additional WCAG 2.0 requirements nor does it replace or supersede them in any way.

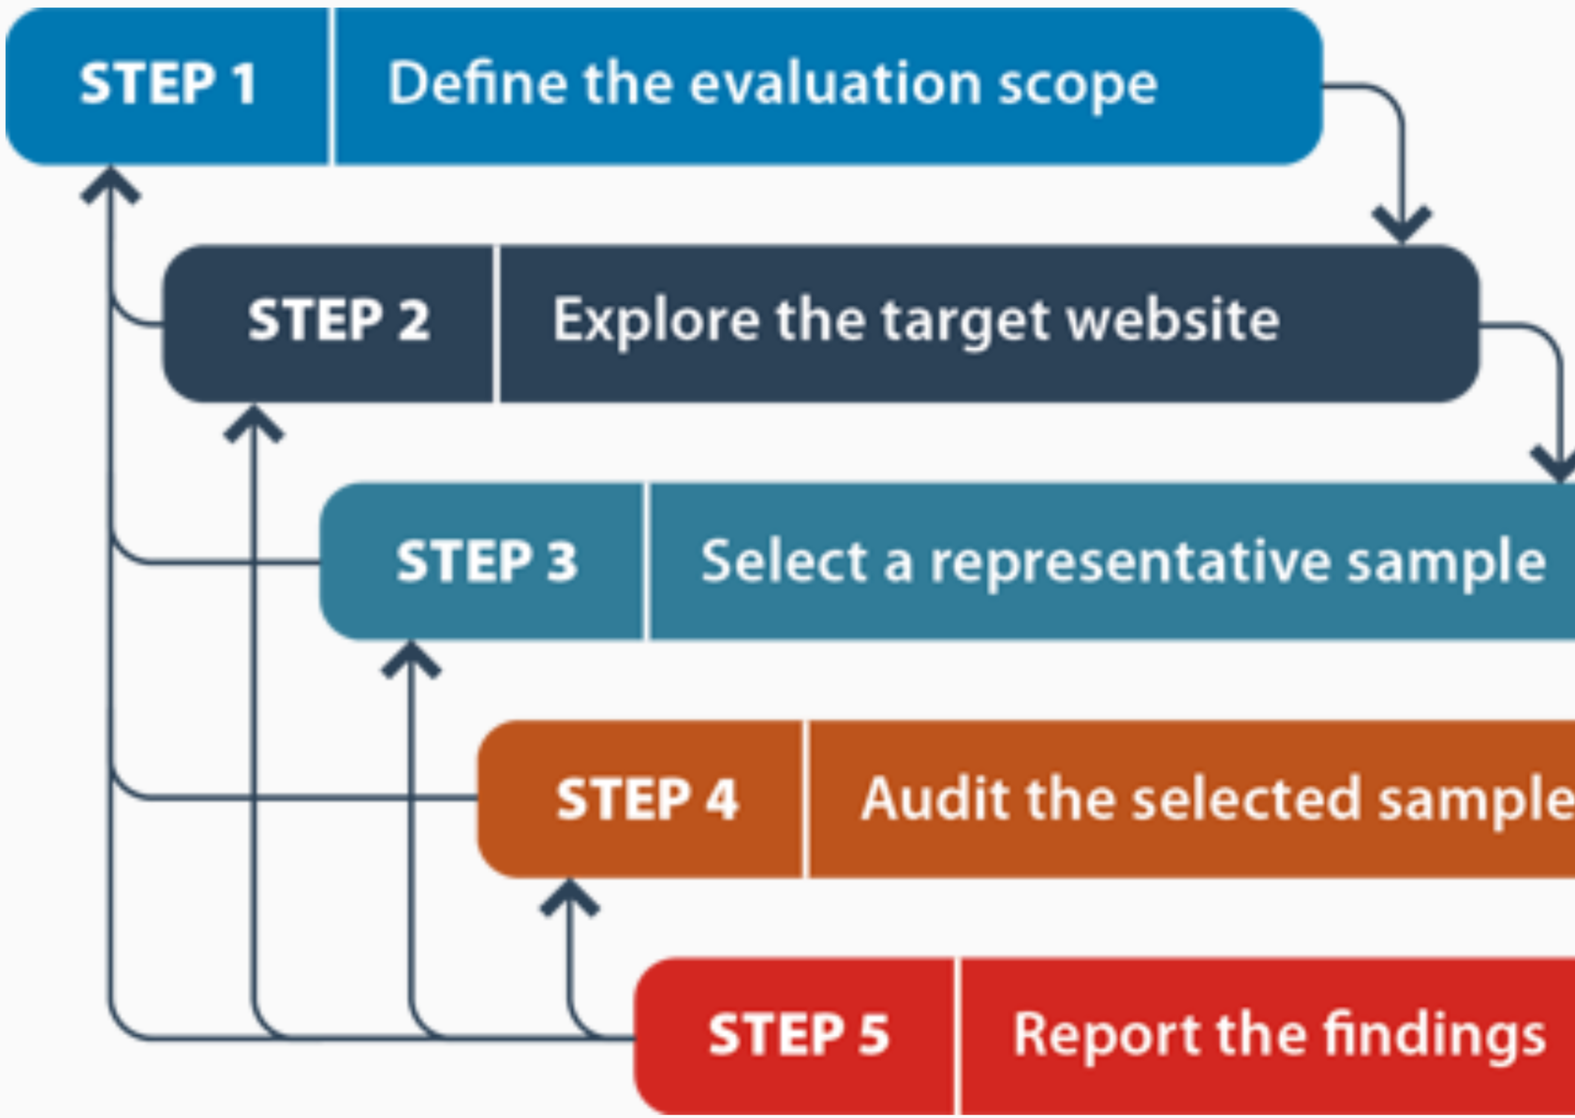

The methodology described in this document is intended for people who are experienced in evaluating accessibility using WCAG 2.0 and its supporting

WCAG-EM

Website Accessibility Conformance Evaluation Methodology (WCAG-EM) 1.0 (2014)

- procedure to evaluate websites: how well do they conform to WCAG?
- guidance on scope, sample selection, reporting
- use on existing websites, or during development
- tech agnostic
- just a process, no new requirements

WCAG-EM

STEP 1
Define the evaluation scope
STEP 2
Explore the target website
STEP 3
Select a representative sample
STEP 4
Audit the selected sample
STEP 5
Report the findings

What WCAG-EM gives us

- a way to establish if a website conforms to WCAG *(especially if it's too big to look at everything)*
- a way to ensure consistency between reports to make them more comparable

What WCAG-EM gives us (Logius)

- a way to establish if a website conforms to WCAG *(especially if it's too big to look at everything)*
- **a way to ensure consistency between reports to make them more comparable**

DigiToegankelijk

Dashboard DigiToegankelijk

Hoe toegankelijk zijn de websites en apps van de Nederlandse overheid? Check het zelf! Zoek een overheidsorganisatie, site of app of bekijk de lijst van alle organisaties, sites en apps.

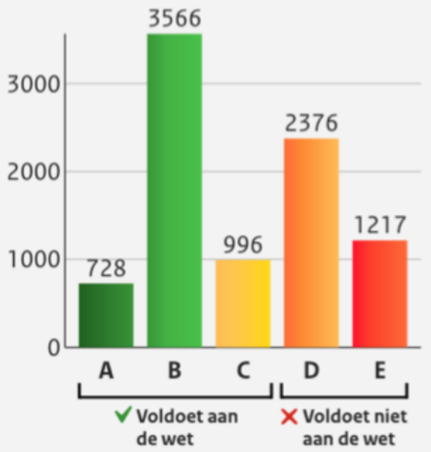

Zoek een organisatie, site of app

Zoeken

Bijvoorbeeld: "Belastingdienst", "www.logius.nl" of "Afvalkalender"

Aantal websites en apps per status

Grafiek | Tabel

De Nederlandse overheid is verantwoordelijk voor de digitale toegankelijkheid van **8883** websites en mobiele apps

60% van de websites en apps voldoet aan de wettelijke verplichting

Dit zijn alle websites en apps met Status A, B of C.

Meer over de wettelijke verplichting

8% van de websites en apps voldoet aan de toegankelijkheidseisen

WCAG-EM 2.0

What we're working on updating

WCAG-EM 2.0

Worked on in the Accessibility Guidelines Working Group (AGWG) for last ~7 months, editors Steve Faulkner (Tetralogical), Hidde de Vries (Logius), Jeroen Hulscher (Logius).

WCAG-EM 2.0

- editorial: spec tooling, spelling, language and URI fixes
- broader scope
  - “sample” → “sample set”
  - “web page” → “view”, “sample”
  - “web site” → “digital product”

WCAG-EM 2.0: status

Currently getting ready for **Draft Note** status and getting Report Tool updated.

Gathering ideas for next phase.

Discussion, questions, ideas

Discussion, questions, ideas

- ideas for a next version
- how to make evaluations more effective?
- how to make evaluations more trustworthy?

Where to send feedback
